Prof. Dr. Examiner Three

SUMMARY

[Write your English summary here. Briefly state the problem your thesis addresses, the approach you took across the chapters, and the main findings. Two to three short paragraphs is typical.]

[Second paragraph placeholder: summarise Chapter 2's contribution.]

[Third paragraph placeholder: summarise Chapters 3-4's contribution and close with the broader implications of your work.]

ZUSAMMENFASSUNG

[Schreiben Sie hier Ihre deutsche Zusammenfassung. Fassen Sie kurz das Problem, den Ansatz und die wichtigsten Ergebnisse Ihrer Arbeit zusammen. Zwei bis drei kurze Absätze sind üblich.]

[Platzhalter für den zweiten Absatz: Zusammenfassung des Beitrags von Kapitel 2.]

[Platzhalter für den dritten Absatz: Zusammenfassung der Kapitel 3-4 und Einordnung der Arbeit in einen größeren Kontext.]

ACKNOWLEDGEMENTS

[Write your acknowledgements here. Typically thank your supervisor(s), committee members, colleagues/group members, and family or friends who supported you during the PhD.]

DECLARATION ON THE USE OF AI

[Optional: state here which chapters, if any, were proofread or assisted by an AI tool, and for what purpose (e.g., grammar and wording checks).]

Chapter 1

GENERAL INTRODUCTION

[Write your general introduction here. This is a "regular" chapter – no manuscript-style front matter, just a normal `\chapter`. Use it to motivate the thesis, review relevant background, and end with a thesis outline that previews Chapters 2-4.]

Placeholder text can cite a reference like this [1], or several at once [2, 3].

1.1 BACKGROUND

[Placeholder section text. Replace with your literature review / background material.]

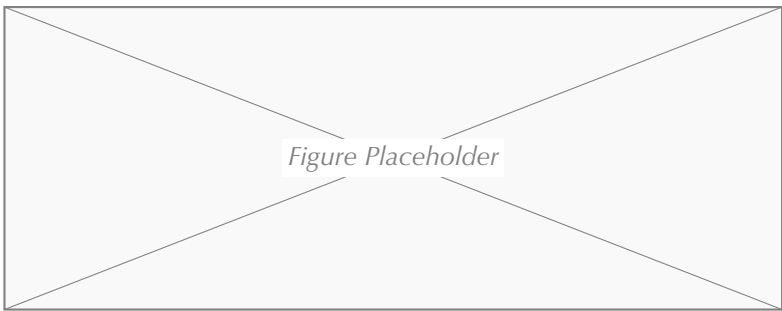

Figure 1.1 – Placeholder figure caption. Replace `\placeholderfigure{width}{height}` with a real `\includegraphics` once you have a figure.

1.2 THESIS OUTLINE

[Placeholder outline text.]

Table 1.1 – Placeholder table caption.

Condition	Metric A	Metric B
Placeholder 1	0.12	3.4
Placeholder 2	0.34	5.6
Placeholder 3	0.56	7.8

In Chapter 2, [placeholder: summarise chapter 2]. In Chapter 3, [placeholder: summarise chapter 3]. In Chapter 4, [placeholder: summarise chapter 4].

Chapter 2

PLACEHOLDER MANUSCRIPT TITLE FOR CHAPTER TWO

Authors: Your Name^a, Coauthor First^a, Coauthor Second^a

^a*Your Institute, Your Department, Your University, City, Country*

Contributions: [Placeholder: describe who designed research, performed experiments, analysed data, and wrote the manuscript, using initials, e.g. YN and CF designed research; YN performed experiments; YN analyzed data; YN, CF and CS wrote the manuscript.]

Abstract

[Placeholder abstract. Summarise the motivation, approach, key results, and significance of this manuscript-style chapter in one paragraph, as you would for a journal submission.]

2.1 INTRODUCTION

[Placeholder introduction. Motivate the specific question this manuscript addresses and cite relevant prior work, e.g. [1].]

2.2 RESULTS

[Placeholder results section.]

2.3 DISCUSSION

[Placeholder discussion section, interpreting the results and relating them back to the literature, e.g. [2].]

2.4 METHODS

[Placeholder methods section.]

ACKNOWLEDGMENTS

[Placeholder acknowledgements specific to this manuscript, e.g. thanking collaborators who provided materials, statistical consultation, or funding.]

PLACEHOLDER MANUSCRIPT TITLE FOR CHAPTER THREE

Authors: Your Name^a, Coauthor First^a

^a*Your Institute, Your Department, Your University, City, Country*

Contributions: [Placeholder author contribution statement.]

Abstract

[Placeholder abstract for Chapter 3. This example shows an alternative layout where section headings live in `ch3.tex` and each section's body text is a separate subfile – as opposed to Chapter 2, where each subfile defines its own `\section`. Either pattern works; pick whichever keeps your files easiest to navigate.]

Supplementary Information

C.1 SI METHODS

[Placeholder supplementary methods text for Chapter 4, e.g. citing [1]. Note: the original thesis also cross-references an externally, separately-compiled journal-submission SI PDF from this chapter (via the `xr` package's `\externaldocument`, see `chapter_4/settings/` in the original). That's an advanced, journal-specific technique and isn't reproduced here – see the README for a pointer if you need it.]
